IDENTIFIERS	*Bureau of Indian Affairs

ABSTRACT

Statistics concerning Indian education are published annually by the Bureau of Indian Affairs (BIA) and are made available following the close of the school term which the statistics cover. In this annual report for 1970, after a brief historical account of the BIA role in Indian education, 28 pages of statistics are given on enrollment and average daily attendance in boarding, day, and hospital schools; completions and graduates by area; enrollment by degree of Indian blood and by tribe; school construction; Federal projects which benefited Indian children; and the 1970 summer program. A fact sheet on schools operated by the BIA is also provided. As pointed out in the document, the BIA had direct responsibility for 56,238 Indian children enrolled in Federal schools and housed in Federal dormitories and had partial financial responsibility for approximately two-thirds of those enrolled in public schools during 1970. Statistics show that there were 185,587 Indian students 5 to 18 years of age enrolled in Federal, private, and mission schools during 1970. (EL)

EDUCATION OF INDIAN CHILDREN IN 1970

Indian children attend public, Federal, private, and mission schools. In fiscal year 1970 there were 185,587 Indian students, ages 5 to 18 years, inclusive, enrolled in these schools in the United States.

Education of Indian children residing in the States of California, Idaho, Michigan, Minnesota, Nebraska, Oregon, Texas, Washington, and Wisconsin is the responsibility of the state concerned.

In 1970 more than half (61.7 percent) of all Indian children of school age (5 - 18) attended public schools. Of those enrolled in school, 68.4 percent attended public schools, 25.8 percent attended Federal schools, and 5.8 percent attended mission and other schools.

For more than three centuries Indian education in the United States was largely under the direction of missionaries. As early as 1568 the Jesuit Fathers organized a school at Havana, Cuba, for Indian children from Florida. This was the first school attended by Indian children who lived within the United States.

Many of the treaties between the United States and Indian tribes provided for the establishment of schools for Indian children. Congress has also provided schools for Indian children where other educational facilities were not available. In 1842, there were 37 Indian schools in operation and by 1881 the number had increased to 106. In 1970 the Bureau of Indian Affairs operated 215 schools with an enrollment of 52,195 Indian children, and 19 dormitories for 4,043 children attending public schools.

The primary objective of Federal schools operated for Indian children living on Indian-owned or restricted trust lands is to prepare them for successful living. In Federal schools children develop basic academic skills, acquire an understanding of the social and economic world which surrounds them, learn improved standards of living, follow practices which assure optimum health, acquire the necessary vocational training to qualify for gainful employment, and obtain sufficient education to enter special schools and institutions of higher learning. The system of schools provided by the Federal Government for Indian children meets

program standards required by the States in which they operate, and all but one of the secondary schools are accredited. (Plant facilities at the school lacking accreditation have not yet been brought up to required standards.) A full 4-year high school course is offered at 25 schools. Seven other schools offered high school training at less than the full 4-year course.

Indian children are entitled to the same opportunities for public school education as are provided for other citizens living within a State. It is encouraging to note that the States have assumed responsibility for the education of 126,859 (61.7 percent) school-age Indian children in the States where the Bureau of Indian Affairs has direct educational responsibility. Over one-third are educated at no cost to the Bureau of Indian Affairs. In some States, however, tax-exempt, Indian-owned lands and large numbers of Indian children within a school district may create financial burdens for which local funds are inadequate. As early as 1890, contracts providing for financial assistance to schools attended by Indian children were negotiated with individual districts. It was recognized then, as today, that Indian children become better adjusted to living with all people in a community when they associate with other children in public schools. The Johnson-O'Malley Act, which became law in 1934, authorized the Secretary of the Interior to enter into contracts with States for the education of Indians and to permit the use of Federal School buildings and equipment by local school authorities. Consequently, some States with large Indian populations now have no Federal schools within their boundaries.

Under the terms of Public Law 874, 81st Cong. (64 Stat. 1100), as amended August 13, 1958, administered by the Department of Health, Education, and Welfare, a new Federal aid resource was made available to eligible school districts educating Indian children. This aid is available to meet partial costs of normal school operation. Additional supplemental aid for the education of Indian children under the Johnson-O'Malley program is limited to districts that do not qualify under the Public Law 874 program and to districts meeting educational programs under extraordinary circumstances, including special services and special programs designed to facilitate the education of Indian children.

In fiscal year 1970, the Bureau of Indian Affairs entered into contracts with 15 States and with school districts in 8 other States, in accordance with approved plans which specify conditions under which financial aid is extended. In addition to these, aid was provided through contracts for the education in public schools of 2,146 out-of-district Indian children living in dormitories operated by the Bureau of Indian Affairs in 7 towns adjacent to the Navajo Reservation, and in Albuquerque, New Mexico.

In summary, then, the Bureau of Indian Affairs had direct responsibility for the 56,238 children enrolled in Federal schools and housed in Federal dormitories, and partial financial responsibility for approximately two-thirds of those enrolled in public schools.

Statistics concerning Indian education are published annually by the Bureau of Indian Affairs and are available the fall following the close of the school term which they cover.

Congressional appropriations to the Bureau of Indian Affairs are limited to the education of children of one-fourth or more degree of Indian blood and native children in Alaska, except for the Cherokee Agency where children of less than one-quarter degree of Indian blood enrolled in the tribe may attend Federal schools. Native children in Alaska are Indian, Eskimo, and Aleut. The 14 tables below relate to Indian and native children, as defined above, and to their schools.

Table 1 shows the enumeration of all Indian children from 5 to 18 years, inclusive, and those over 18 who are enrolled in school by area, agency, and school status.

For Indian children who are enrolled in public schools and are no longer a Federal education responsibility, the Bureau must rely on the public school systems to provide census information. Indian mobility accounts for the children, 5 to 18 years inclusive, who are shown under the caption "Information Not Available."

Five-year olds have been included with the school-age population since fiscal year 1969 when kindergarten classes were added in some schools operated by the Bureau of Indian Affairs.

It should be noted that children over 18 are not included in the enumeration of school-age population. Table 1 is based on the annual school census of Indian children 5 to 18 years old, while tables 2 through 11 are derived from annual attendance reports of individual schools operated by the Bureau of Indian Affairs and cover all students enrolled regardless of their ages.

Table 2 indicates enrollment and average daily attendance in Federal schools by type of school and area. Average daily attendance for all schools, exclusive of hospital schools, was 83.0 percent in 1970 as compared to 84.3 percent in 1969. Table 3 indicates numbers of schools by area.

The following changes account for a net decrease of 7 in the number of facilities operated in fiscal year 1970.

Area	Type	Opened	Closed	Transferred to Public School
Anadarko	Dormitory	1		
Juneau	Day School			6
Navajo	Day School			1
Phoenix	Day School		1	
TOTALS		1	1	7

In fiscal year 1970 the Bureau of Indian Affairs operated kindergarten classes in 59 schools (24 boarding schools and 35 day schools) with an enrollment of 1,681 children. All kindergarten pupils attend school on a day basis. The kindergarten enrollment represented 3.2 percent of the total enrollment.

Tables 4, 5, 6 and 7 list individual schools, instructional units in hospitals, and dormitories operated by the Bureau of Indian Affairs, mailing address, enrollment, average daily attendance, and grades taught. The Albuquerque Dormitory is operated in conjunction with the Albuquerque Indian School but is shown with peripheral dormitories because these dormitory students attend public schools under conditions identical to other peripheral dormitories.

Table 8 indicates grade level. In 1970 enrollment in the beginners and first 4 grades decreased by 707 pupils to 22,304 as compared to the previous year's 23,011. This group represents 42.7 percent of the entire student body.

An enrollment of 1,621 ungraded elementary and secondary students account for 3.1 percent of total enrollment.

In line with the Bureau's policy of encouraging public school enrollment of Indian children, many students transfer to public schools when they reach the sixth grade and have acquired some facility in the use of the English language. This is a factor in the seemingly low numbers of graduates of Federal high schools. In fiscal year 1970, 1,939 high school students graduated, a decrease of 100 students from 1969.

Table 9 indicates the number of high school graduates, number of 8th grade completions, and number of post high completions.

Table 10 indicates students according to their degree of Indian blood. Full bloods comprise 7[illegible].1 percent of the total and only 4.9 percent are less than one-half Indian.

Table 11 shows tribal designation of students in Federal schools. One hundred and thirty-three specific tribes or tribal groups and Aleuts, Eskimos, and the various tribes of Indians in Alaska were represented in 1970.

Ninety-six tribes had fewer than 39 members each and these are grouped together as "All Other Tribes." Aleuts, Eskimos, Navajos, Sioux, Chippewas, and Pueblos (including Hopi, shown separately) are the most numerous and together comprise 80.1 percent of the total enrollment.

Table 12 indicates the completed school construction, both new and replacement, during fiscal year 1970.

In fiscal year 1970, the Bureau of Indian Affairs participated for the fourth year in the Elementary and Secondary Education Act. Table 13 indicates the extent of the activities carried out under Titles I, II, III, and VI, of the program.

Table 14 shows the number of participants in the summer program, by category, for fiscal years 1960 through 1970.
